

5 PASSWORD TIPS

LOOKS STRONG? THINK AGAIN. 🔍

1

Just adding @ and ! won't help if the structure is common. Avoid predictable patterns like Name+DoB.

2

ONE PASSWORD = ONE SITE 🔑

Reusing passwords is like using one key for your home, car, and locker. Don't do it.

3

STOP RELYING ON MEMORY 🧠

Your brain is not a password manager. Use a trusted password manager instead of reusing or writing them down.

4

DON'T JUST FOLLOW RULES 🚫

Security isn't about ticking boxes. It's about making informed, thoughtful choices.

5

KNOW WHAT TOOLS ARE OUT THERE. 📝

Tools like HaveIBeenPwned can show if your password was leaked. Use them regularly.

These tips are based on real survey results from UNSW students.
Security is not about being paranoid—it's about being prepared.
